Here we have a page
that is full of
information. It has
part of it that is a
'view port'
into another
part of the virtual
space, in this case
another document
which is located
spatially to the right.

Over here a second page is
located spatially to the right of
the first page, as you can see the
user can get to this page two
ways 1. By panning to the right
or 2. By flying through the
visual wormhole and being
'teleported' over here. Of
course the experience would
appear analog and seamless.
